

## Welcome

**Welcome** to the Zoosk iPhone App Tutorial. We created the Zoosk iPhone App as one more way to access Zoosk on-the-go. The App takes all of your favorite features from Zoosk.com and makes them accessible on an iPhone. This tutorial will explain all the features the Zoosk App has to offer, along with how best to take advantage of them to meet your prospective dates.

The main menu that opens to users consists of the following eight menu items: 'Activities', 'Search', 'Zooskbox', 'Views', 'My Profile', 'My Subscription', 'Friends', and 'Contact Zoosk'.

- Anyone can download the Zoosk iPhone App, though some of the features can only be accessed by paid Subscribers.

\*You can return to the main menu page from any screen by selecting  , near the top of the screen on the navigation bar.

## Activities

The 'Activities' page shares info about new Zooskers and Zoosk profile updates. Checking your 'Activities' makes it easy to stay up-to-date with what others using Zoosk have been up to since you last visited. The live feed on the 'Activities' page gives you the latest information about new Zooskers that fit your dating criteria.

- **Both *Free Members* and *Subscribers* can access and view the 'Activities' page.**

## Search

When you first set up your Zoosk account, on your iPhone or Zoosk.com, we ask you to fill out a few questions about the type of people you are interested in dating. After this initial set up, the 'Search' will include results that match to your last settings.

If you wish to change your search options while using the Zoosk App: simply tap , found in the upper right corner of the screen, and select any options you wish to change.
